APPENDIX 2

MANITOBA RUNNERS' ASSOCIATION, INC. 2024 RACE STANDARDS

The MRA is concerned with runner safety and promotes the interests of road runners in Manitoba. All MRA sanctioned events will maintain the following standards:

Feature	Standards
Entry Forms/Course Maps, etc.	To be accessible to all participants, we recommend a downloadable version of Event documents be available.
Event Day Administration	Event day registration is optional, or may state in printed & promotional materials that there will be no event day registration; race to start on time; runners called to start line when race is about to start. Optional baggage check, if available, must be supervised throughout the Event.
Washrooms	At least two washrooms/portables available per 100 runners.
Medical support	A person with current First Aid training must be on site ½ hour prior to the start and stay until the end of the event. Race Director is responsible to see that First Aid people have adequate supplies. Should have medical spotters on the course with communication equipment, i.e.: cell phone or radio.
Water stations	Water stations offering drinking water to all participants should be positioned at least every 5km along the course, with more density for longer races and on hot days. If temperature with the humidex is greater than 25°C then increase number of water stations on running route to MINIMUM every 2.5km.
Traffic Control & Marshalling	Warning signs at all intersections and active parking lots; traffic cones along all areas where participants use the roadway; lead bicycle is familiar with the course and has communication equipment; trailing bicycle/vehicle with communication; all intersections controlled by marshals wearing safety vests or police as required by permits. We recommend that motorized vehicles be used to follow the last runner and not be used as lead.
Insurance	The MRA provides liability insurance to the Event which covers all participants, volunteers, organizers and spectators
Course Measurement, Start and Finish areas, Timing	An untimed Fun Run can be an approximated distance and need not be officially measured. A timed but uncertified course can be measured by car, bicycle odometer, or GPS system. A timed and certified course must be measured by a recognized MRA course measurer and certified by Athletics Canada. To participate in the MRA Classic Race Series a race must be timed and certified. There must be a visible start and finish line as well as an efficient finish line chute and system to correctly capture all finishing times. Timers should be recognized by the MRA. Course to be checked and confirmed by the Race Director prior to start. Split times are not required.
Results	Digital display of times (clock) at the finish of the race. Full unofficial results and position of all race finishers to be published on site within one hour of the finish. Official results to be sent electronically (pdf) to the MRA within 24 hours (clock & results not required for a fun run).
Recognition	Not required for a fun run. Recognition should be given to the top 3 male and female race finishers overall and to the top male and female in each age category. The size and value of any awards given must be the same for male and female winners. Announcing names/times, taking pictures and medals or prizes are all acceptable forms of recognition.
